

AMENDMENTS TO THE CLAIMS

1. (currently amended) A pharmaceutical composition ~~suitable for parenteral administration~~ having anti-inflammatory and analgesic property, comprising an alkylammonium salt of a 2-arylpropionic acid selected from the group consisting of ketoprofen, ibuprofen, naproxen or tiaprofenic acid, in racemic or enantiomeric form, in an aqueous solution at a pH in the range from 8 to 9, said solution being free of preservatives and, co-solvents ~~and supporting substances~~, wherein the composition is formulated for parenteral administration.

2. (previously presented) A pharmaceutical composition as claimed in claim 1, containing a L-lysine salt of ketoprofen.

3. (original) A pharmaceutical composition as claimed in claim 2, containing sodium bicarbonate and sodium hydroxide at pH 8.5.
